

EcoGown™

The EcoGown™ is our innovative solution to double-gowning. By switching to the EcoGown™ your facility will reduce unnecessary waste and provide patients with a more comfortable and accessible patient gown.

1. V-Neck

The v-neck offers a comfortable neckline for your patients.

2. Accessible Ties

There is a simple tie enclosure available on the front so that patients are able to easily access it.

3. Reversible

To reduce patient confusion the EcoGown™ is fully reversible.

4. One Size Fits Most

Our unique design provides increased patient coverage for a wider range of patient sizes.

5. Modest Coverage

This modesty gown for patients is cut with a large sweep that wraps around the rear of the patient.

6. Eliminate Double Gowning

Implementing the EcoGown™ has reduced patient gown utilization by more than 20% primarily by eliminating double gowning.

Using your EcoGown™

The EcoGown™ saves healthcare facilities money, reduces waste, and minimizes your carbon footprint. The EcoGown™ uses the convenient, easy to use Ecotex bag distribution system.

Step 1. V-Neck

Place each arm in an arm hole and slide the v-neck to your neckline.

Step 2. Pass Around Back

Grasp the tie from the back of the gown and wrap the large sweep of material around the back of the gown to the front side.

Step 3. Ties

Connect the two ties on the front side of the gown as well as the ties at the neckline the gown will stay closed whether the neck ties are drawn or not.
